

## QUALITY products for the British Army

A site visit is arranged before we begin design, or we can work from supplied drawings, together with cross referencing systems for NSN identification numbers, even identifying drawings from items from as far back as the 1960's.

In addition, we have access to bespoke parts used on some of these assemblies, and facilities to

manufacture specialist hardware for the M.O.D and its sub-contractors.

This combination of our vast drawings archive, together with our history of business with the M.O.D, puts us in a strong position to develop new products for the needs of the future in this field, to the highest design and quality.

The range of products we can produce for the M.O.D are from webbing strap products, webbing net products, rope products, webbing sling products, and wire rope products.

Please contact us for further information or to arrange a consultation.

Comptons 2000...  
where quality always comes first.
